

Amancha Chanikya

chanikya955@gmail.com | LinkedIn | Github | Portfolio | Hyderabad

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Java, SQL and MERN Stack with strong knowledge of OOP, DSA and DBMS. Experienced in developing Full Stack and AI powered applications with a focus on problem solving and scalable software solutions.

EDUCATIONAL QUALIFICATIONS

MLR INSTITUTE OF TECHNOLOGY	9.13 CGPA
<i>Bachelor of Technology, Computer Science and Engineering</i>	<i>2023 - 2027</i>
SRI CHAITANYA JUNIOR COLLEGE	98.1%
<i>Telangana State Board of Intermediate Education</i>	<i>2021-2023</i>
TVR MODEL HIGH SCHOOL	10 CGPA
<i>Telangana Board of Secondary Education</i>	<i>2021</i>

EXPERIENCE

Frontend Developer & UI/UX Designer Intern | Apollo Pharmacies June 2026 - Present

- Engineered responsive e-commerce UI with React.js and JavaScript, creating 12 reusable components and fluid grid layouts, decreasing page load time by 1.8 seconds across devices.
- Designed and prototyped user centric UI/UX workflows using Figma and Framer, applying usability, accessibility and interaction-design principles to improve product discovery and customer engagement.
- Enhanced frontend usability & customer interaction across E-commerce workflows by streamlining navigation & implementing conversion focused interface design, resulting in a 15% increase in user engagement & 21% improvement in checkout completion

PROJECTS

AI MailCraft - Intelligent Email Generation Platform | Github

Tech Stack: Java, Spring Boot, React, Gemini API, Claude, JWT, REST API's, Javascript, Maven, Manifest V3

- Created a full stack email generation application that uses Google Gemini to draft context-aware emails across Professional, Friendly, Casual, Academic and Concise writing styles.
- Developed a Chrome extension with Manifest V3 and JavaScript to capture email context and connect with Spring Boot REST APIs for generating replies directly within webmail.
- Implemented a modular client-server architecture and secure API integration using Spring Web/WebFlux keeping Gemini API secure

Lexis AI-Powered RAG Study & Knowledge Platform | Github | Live Site

Tech Stack: Python, FastAPI, RAG, React, Gemini API, VectorDB, Embeddings/Retrieval

- Engineered a document-based study platform supporting PDF, TXT, DOCX, Markdown, CSV, and JSON uploads with automated text processing and semantic search.
- Designed a Retrieval-Augmented Generation pipeline using document chunking, overlap, embeddings, similarity & top-k search
- Orchestrated Gemini API-driven command execution, enabling users to create workspaces via chat; reduced workspace setup time by 70 minutes per request, saving 12 hours weekly..

VaultPad - Automated Secure Code & File Storage Platform | Github | Live Site

Tech Stack: Node.js, MongoDB, Javascript, Bootstrap, Gemini API, Google OAuth, Cloudinary

- Engineered a secure full-stack storage platform using Node.js, Express.js, MongoDB and Cloudinary, which streamlined file management for over 150 developers, enhancing project collaboration and efficiency across the team.
- Added Gemini API-powered automation and AI assistance to execute user commands for workspace creation and provide conversational support, streamlining file organization and workspace management.
- Built file and code management features with Multer and Cloudinary, supporting uploads, downloads, deletion, code snippet management, image optimization, profile pictures, personalized dashboards and multi-format file handling.

SKILLS AND TECHNOLOGIES

- | | |
|--|--|
| • Programming Languages: Java, Python, SQL | • Databases: MySQL, MongoDB, OracleDB, VectorDB |
| • Frontend: HTML, CSS, JavaScript, Bootstrap, React.js | • AI & Generative AI: RAG, LLMs, Prompt Engineering |
| • Backend: Node.js, Spring Boot, REST APIs, Fast APIs | • Developer Tools: Git, GitHub, VS Code, Maven, Notion |

ACHIEVEMENTS

- Secured top honors at 3 major hackathons - NeuraX Hackathon (Agriculture Domain), Innovation Challenge (IoT Domain), and Zignasa Hackathon (UI/UX Design), demonstrating innovation, problem-solving and technical design expertise.
- Runner-Up in the INIT Saga Hackathon for developing a Healthcare Management Platform.
- Design Lead at CIE, leading and mentoring junior designers while creating visual assets for 10+ major events
- Mentored 100+ first year engineering students as a Micro Project Mentor, providing technical guidance, debugging support and project development assistance in both hardware and software.

CERTIFICATIONS

Java Full Stack with AI - Brainovision Solutions India Pvt. Ltd. | Web Development Fundamentals - IBM
Certified in ServiceNow CSA & CAD | Generative AI Course - Google | Claude Code 101 - Anthropic
Oracle Cloud Infrastructure Foundations Associate | Certified in SQL - HackerRank
