

Amancha Chanikya

chanikya955@gmail.com | LinkedIn | Github | Portfolio | Hyderabad

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate skilled in Java, SQL and MERN Stack with strong knowledge of OOP, DSA and DBMS. Experienced in developing full-stack and AI-powered applications with a focus on problem-solving and scalable software solutions.

EDUCATIONAL QUALIFICATIONS

MLR INTITUTE OF TECHNOLOGY

Bachelor of Technology, Computer Science and Engineering

9.13 CGPA

2023 - 2027

EXPERIENCE

Frontend Developer & UI/UX Designer Intern | Apollo Pharmacies

June 2026 - Present

- Designed and optimized responsive UI/UX screens for Apollo Pharmacies e-commerce platform, applying user-centered design, usability and accessibility principles.
- Translated UI/UX designs into responsive frontend interfaces and collaborated with development teams to implement reusable components and maintain cross-device consistency.

PROJECTS

AI MailCraft - Intelligent Email Generation Platform | Github

Tech Stack: Java, Spring Boot, React, Gemini API, REST API's, Javascript, JUnit

- Developed an AI-powered email productivity platform using Java 17, Spring Boot 3, React and Google Gemini API generating contextual email responses across multiple communication tones.
- Built a Manifest V3 Chrome Extension integrated with Gmail, enabling users to generate and insert AI-powered replies directly into emails, with support for Professional, Friendly, Casual, Academic and Concise tones.

Lexis AI-Powered RAG Study & Knowledge Platform | Github

Tech Stack: Python, FastAPI, RAG, React, Gemini API, VectorDB, Embeddings/Retrieval

- Engineered a Retrieval-Augmented Generation (RAG) pipeline that ingests PDF, TXT, DOCX, Markdown, CSV and JSON documents, performs document parsing and configurable chunking with overlap and prepares content for contextual retrieval.
- Implemented similarity-based Top-K retrieval with keyword/phrase matching to identify relevant document chunks and construct grounded context for Gemini-powered responses, displaying retrieved sources and citations with each answer.

VaultPad - Automated Secure Code & File Storage Platform | Github | [Live Site](#)

Tech Stack: Node.js, Express.js, MongoDB, Javascript, Bootstrap, Gemini API, Google OAuth, Cloudinary

- Engineered a secure full-stack storage platform using Node.js, Express.js, MongoDB and Cloudinary for managing files, images, code snippets and development notes with user-specific data isolation.
- Integrated Gemini API-powered automation and AI assistance to execute user commands for workspace creation and provide conversational support, streamlining file organization and workspace management.

SKILLS & TECHNOLOGIES

Programming Languages: Java, Python, SQL

Frontend: HTML5, CSS3, JavaScript, Bootstrap, React.js

Backend: Node.js, Spring Boot, REST APIs

Databases: MySQL, MongoDB, OracleDB, Supabase

AI & Generative AI: RAG, LLMs, Prompt Engineering

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Notion

ACHIEVEMENTS

- Secured 1st Place in the Innovation Challenge Hackathon for developing a portable Bucket Air Conditioner.
- Secured Runner-Up in the INIT Saga Hackathon for developing a Healthcare Management Platform.
- Mentored **100+** first-year engineering students in hardware and software projects, providing technical guidance, debugging and development support.

CERTIFICATIONS

- Java Full Stack with AI - Brainovision Solutions India Pvt. Ltd. | Web Development Fundamentals - IBM
- Certified in ServiceNow CSA & CAD | Generative AI Course - Google | Claude Code 101 - Anthropic
- Oracle Cloud Infrastructure Foundations Associate - Oracle | Certified in SQL - HackerRank
